

La unión hace la excelencia, de la excelencia nace

Infinox & Trading Alto Rendimiento, launch to the market **Bluestone Fx**, the new intelligent capital management formula, according to the strictest parameters, which ensure an optimal return on our investments with ZERO risk.

Bluestone Fx is an evolution of our Ultimate MAM account, which obtained a return in 2022 of 117%. The big difference between the accounts is their risk factor, where in Bluestone a drawdown of less than 15% has been taken as a reference, hence their ZERO risk of capital loss in the short, medium and long term.

What Bluestone Fx offers to its clients:

- Generation of linear and constant benefits over time.
- Low exposure of your capital, with a drawdown of no more than 15%.
- ZERO risk of losing the master account.
- Use of dynamic and complementary strategies to minimize risks.
- The management of your capital is supervised 24 hours a day, 365 days a year.
- Use of the world's leading fund management company (Infinox). Quick execution of orders, minimal slippage and withdrawal of funds in 24 hours with multiple existing formulas today.
- Professionals at your disposal with more than 15 years in the financial sector, especially in Private Banking and fund management in multiple markets and with different profiles. (High Yield Trading)
- Possibility of having a direct line with your fund manager, who will keep you promptly informed of its movements.
- You will be able to follow the evolution of the fund in REAL time through different applications and from your mobile phone.
- The investor has control of his capital at all times, being able to capitalize or withdraw his investment immediately.
- The investor has his capital at all times in HIS UNIQUE, PERSONAL and NON-TRANSFERABLE ACCOUNT, accessible through his personal passwords and thus avoiding the manipulation of his funds by third parties.

Bluestone Fx objectives.

Bluestone Fx has different funds tailored to the needs of each investor. It is the investor who chooses between a low, medium or high risk return fund, depending on the return that the capital is looking for.

Return / exposure ratio is the fundamental key of the fund, where it is preferred to obtain linear and constant benefits in order to minimize investment risk to zero.

Bluestone Fx is made up of the following investment strategies that we detail below. Depending on the level of return, its composition may vary. These strategies have been working in the market since 2016, simply undergoing some tweaks as the markets have evolved.

In the following table, you can see the weighted data of all the strategies working at the same time. We highlight their average yield, as well as the low capital exposure. We detail the markets in which we work, as well as the timing of the strategies and their basis of work, either through indicators or under mathematical statistics of market data.

Here you can see that the monthly average obtained by the fund (4.16%), which yields an annual dividend of 49.89%

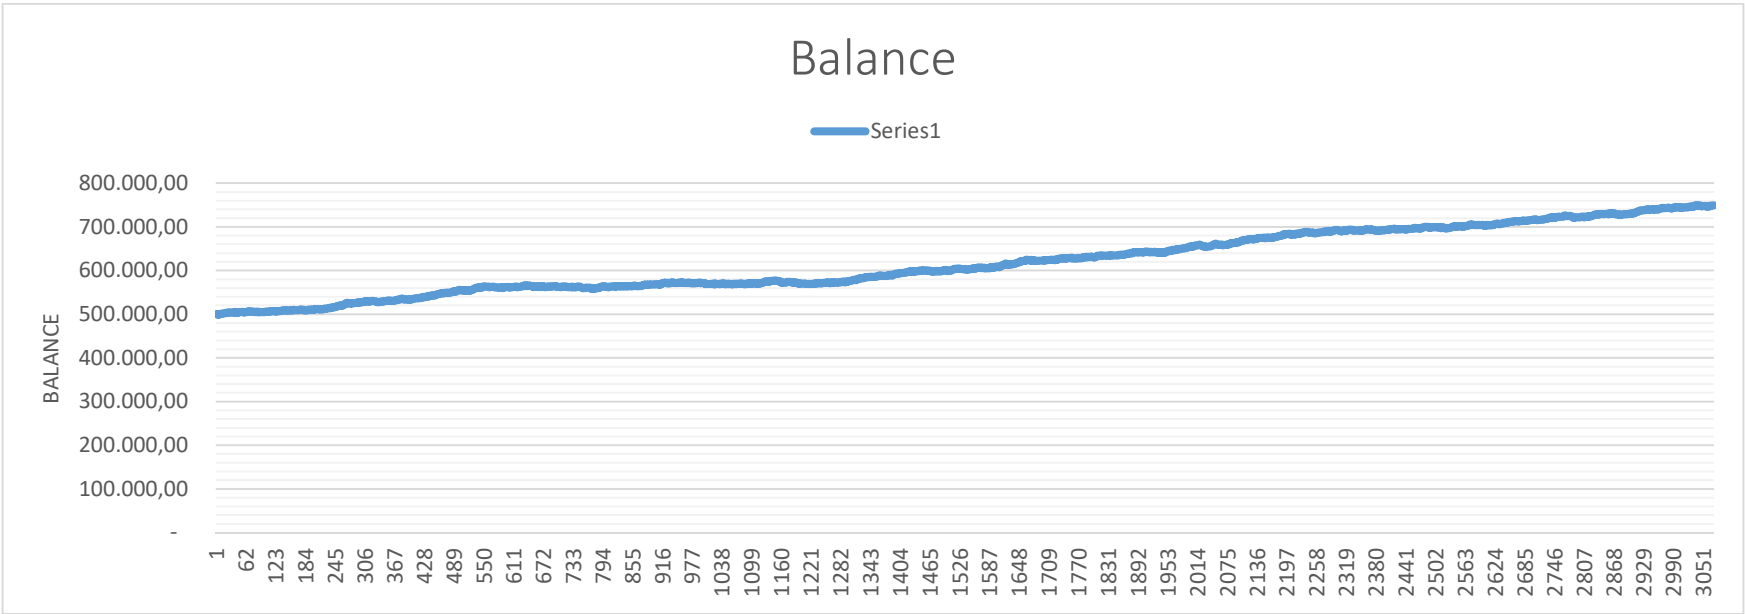

Very attractive dividend for any type of investor where security of capital prevails.

The MAXIMUM risk exposure of the Bluestone Fx fund capital during the year 2022 was only 5%.

This is due to the fact that capital management is very strict, not allowing lots to be opened to the market that could put the account at risk.

We have the history of all the movements made during the year 2022, where you can see said risk management.

Lastly, we present the graph of the evolution of the profit, where you can verify that once again it is a linear and constant positive evolution of the fund, and where the evolution of the same is verified.

Without further ado, we look forward to your trust in and to becoming a part of Bluestone Fx in the near future.
